

# Computer Program Solutions

## QUESTION 5

Ethan Van Rensburg – System Development  
Learnership Candidate

*18 – 23 June 2024*

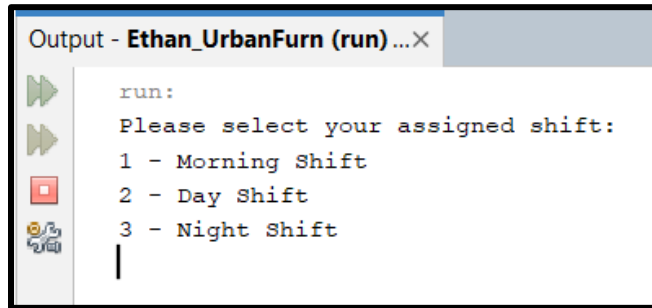

## Contents

Test Cases: .....	1
Case 1: .....	1
Case 2: .....	3
Case 3: .....	4
Feedback:.....	5

## Test Cases:

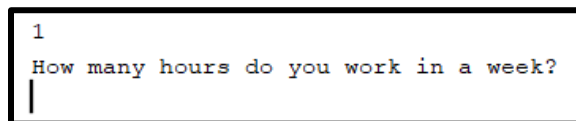

### Case 1:

If the user runs the program, the program will prompt them with an input:

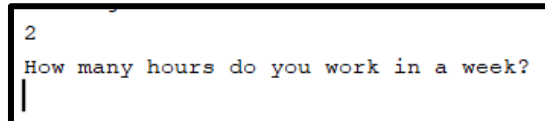

```
Output - Ethan_UrbanFurn (run) ...X
run:
Please select your assigned shift:
1 - Morning Shift
2 - Day Shift
3 - Night Shift
|
```

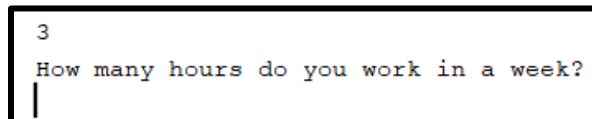

If the user chooses an input within the program's range (1-3), they will then continue through the system.

```
1
How many hours do you work in a week?
|
```

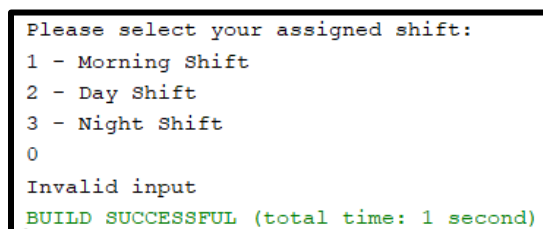

```
2
How many hours do you work in a week?
|
```

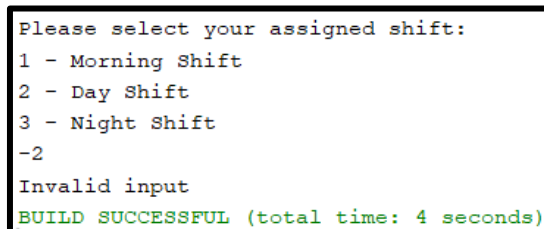

```
3
How many hours do you work in a week?
|
```

If the user selects an input that is not within the range and that is not an integer, they will be presented with the following:

```
Please select your assigned shift:
1 - Morning Shift
2 - Day Shift
3 - Night Shift
0
Invalid input
BUILD SUCCESSFUL (total time: 1 second)
```

```
Please select your assigned shift:
1 - Morning Shift
2 - Day Shift
3 - Night Shift
-2
Invalid input
BUILD SUCCESSFUL (total time: 4 seconds)
```

The last input result is involved with the input of Strings, as the program rejects Strings and produces corresponding exception errors due to their entries.s

```
Please select your assigned shift:
1 - Morning Shift
2 - Day Shift
3 - Night Shift

C:\Users\ETHAN.V\AppData\Local\NetBeans\Cache\22\executor-snippets\run.xml:68: Java retu
BUILD FAILED (total time: 1 second)
```

To resolve any issues or errors, simply re-click the Run button and users will be given the program's beginning for the proper input.

## Case 2:

After the shift, the user will then need to select the hours, below is the results of each outcome:

### Below the Base range:

```
How many hours do you work in a week?  
0  
Invalid input  
BUILD SUCCESSFUL (total time: 1 minute 40 seconds)
```

```
How many hours do you work in a week?  
34
```

### Within the Base range:

```
How many hours do you work in a week?  
40
```

### Above the Base range:

```
How many hours do you work in a week?  
70
```

### Case 3:

If the user's input for the hours is not a valid integer, the following will be displayed:

```
How many hours do you work in a week?  
£  
Exception in thread "main" java.util.InputMismatchException  
|  
  at java.base/java.util.Scanner.throwFor(Scanner.java:964)  
  at java.base/java.util.Scanner.next(Scanner.java:1619)  
  at java.base/java.util.Scanner.nextInt(Scanner.java:2284)  
  at java.base/java.util.Scanner.nextInt(Scanner.java:2238)  
  at ethan_urbanfurn.Ethan_UrbanFurn.main(Ethan_UrbanFurn.java:28)  
C:\Users\ETHAN.V\AppData\Local\NetBeans\Cache\22\executor-snippets\run.xml:111: The following error  
C:\Users\ETHAN.V\AppData\Local\NetBeans\Cache\22\executor-snippets\run.xml:68: Java returned: 1  
BUILD FAILED (total time: 2 seconds)
```

The program is designed to work with integers only, therefore, if a String or any other data type is entered, the above will display. This is known as an Exception error.

## Feedback:

- Ensure all documents are up to date and that research is documented according to their respective sections.
- Ensure costs and resources are accounted for in their respective documents of validation and evaluation.
- Ensure that diagrams and charts are accurate and represent system design correctly.
